

Cleaning Air,
Naturally,
Anywhere with
SOLUS

NEDLAW
LIVING WALLS
Clean air, naturally.™

Bring Nature Indoors with SOLUS

With 90% of our lives spent indoors, having clean, fresh indoor air is essential for our health and well-being.

Solus by Nedlaw uses the power of nature to remove harmful airborne VOC pollutants and circulates naturally clean air back into the room.

With all the patented science you'd find in our large-scale integrated systems, Solus by Nedlaw is ideal for offices, restaurants, spas, classrooms, boardrooms or any space you wish to bring the benefits, beauty, and functionality of a Nedlaw Living Wall.

Now you can clean air, naturally, anywhere with Solus by Nedlaw.

A Nedlaw Living Wall is a working machine that harnesses nature's remarkable ability to "eat" pollutants. Rather than bringing new air into a building (which needs to be heated or cooled), our patented biofilter draws air in, removes harmful pollutants and returns cleansed air, improving indoor environments and building performance.

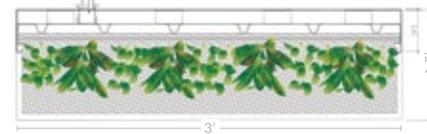

The Solus By Nedlaw, freestanding living wall biofilter is built with sturdy, longlasting marine-grade aluminum and highest quality components. Two layers of our proprietary growth media allow the plant roots to grow freely in between.

This patented design maximizes root exposure to the air flow allowing the system to remove 75% of VOC's* on a single pass, producing high-quality indoor air with minimal energy usage.

Basin

Colour Options

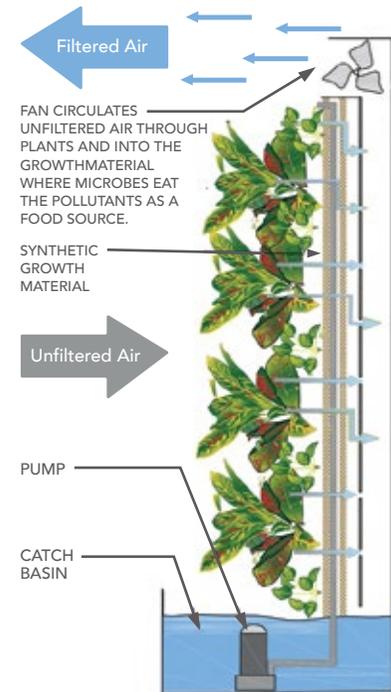

System Requirements

- Two(2) - 120v GFCI Duplex Receptacles (separate circuits)
- Good Quality Water: Low in total dissolved salts and non-softened

Lighting

- Custom integrated artificial grow light included

Filtered air is drawn into the building's air circulation system or circulated using onboard fans.

The Benefits of a Nedlaw Living Wall

- Uses nature's incredible ability to 'consume' pollutants from the air.
- Removes up to 90% of harmful chemicals from indoor air.
- Improves building performance (by eliminating the need to heat or cool air from the outside).
- Absolute design flexibility delivers a Nedlaw Living Wall perfect for your space.
- Can pay for themselves through energy savings and reduction of HVAC equipment.
- Improved Indoor Air Quality makes occupants healthier and happier.
- Immediately offers a robust and mature plant wall for beautiful aesthetics.
- Nedlaw partners with you through Design, Build and Maintenance for a customized and long-term solution.
